

LET YOUR COMPUTER EARN YOU CASH WHILE YOU DO NOTHING !!

For just five to ten minutes of effort by you. You will not need to invest any money. No more than four clicks of your mouse when you boot up your PC and within 10 minutes you will see the cash start to accrue.

This step by step guide will show you how to profit by using a pay-per-click website. The best part is – you **DO NOT** have to click any links to get paid. Your computer will do this by running one program which you can minimise to your system tray leaving your PC free to do whatever you choose to do.

The main website of this pay per click is not very informative at all but it will make you money.

You can check up on your earnings as often or little as you wish. There is also a referral scheme.

You do not have to refer people but it will speed up the earnings you make.

It is also worth noting that instead of just one search engine paying you to click, there are currently

21 different search engines. You can use all of them simultaneously and be paid to "view" their pages.

In about a month another 200 or so search engines are due to be added – or simply ten times more opportunity to make money !!!

Each search engine accrues a separate portion of your "surfing" time. They do have a minimum payout value of \$60. In honesty, with no referrals it could take you two months to accrue \$60 in each search

engine presuming that you leave your computer running day and night. This may seem like a slow process,

however \$60 x 21 or even \$60 x a possible 221 is still a considerable sum of money for doing

NOTHING (or at worst very little). \$1260 for 21 search engines when they hit the \$60 threshold.

That's over \$4000 with the extra search engines added. Just imagine how high you can go with some referrals !!

Please print this page to refer to as you go through the step by step instructions

Please cut and paste the link below to sign up

<http://www.ppcappraisal.com/>

You will now be presented with a form to fill in

Login: Enter your own unique login name

Password: Enter password and confirm it in next field

Company name: Type in "ppc appraisal"

Contact Person: Type in your name

Tax ID: Type in "N/A"

Email address: Type in your email address. Please note that you cannot have any non-alphabetic characters in your email address.

Sign up for a free hotmail account if necessary (<http://mail.yahoo.com>)

Address, etc: Type in your address

URL : Type in "ppcappraisal.com"

Now Click Register.

Now you should be able to login. Please note you will have to confirm your email address to register.

Once you have logged in you will be taken to a menu. Click on **REQUESTS**.

At the bottom of the page click **SELECT** then **REQUEST**.

Then click on **PAGE 2** and click **SELECT** and **REQUEST** again.

If there are more than two pages (and there soon will be) then repeat the above process to select all possible search engines.

Everything is now set for you to start earning money.

The next step is to automate the process so you do not have to do any clicking to earn the cash.

Download [test33.exe](#) file onto your desktop.

Now login to PPC appraisal and click on **CAMPAIGNS** on the menu. Copy your Portal URL which is the one listed on the page.

Your referral URL is listed elsewhere under Account Manager. Make sure the URL has the word portal in it.

Now you have downloaded the test33 program, double click on the icon in your desktop to run the program.

When the browser has opened click on **TOOLS** on the menu bar. Click **ANALYST** then **ACT** then **SETUP**.

This brings a dialog box up on screen. Click on **APPEND** to open popup window. Type word "**Set1**" and click **OK**.

Popup window will disappear. Now in the small window on the left you should see **Set1** inside of it.

Then paste the Portal URL that you copied from the PPC website into the large right window on the right and click **OK**.

On menu bar click **TOOLS** then **ANALYST** then **ACT** then **SET1**. The URL will then load up.

Now click **TOOLS/ANALYST/LOOP**.

<!--[endif]-->On menu bar click **NAVIGATION** then **SIX**.

At this stage you will have opened up six search engine browsers which will accrue money to six search engine totals at a time rather than just one !! The test33 program will now do all the clicking for you cycling through all of the current 21 search engines accruing money to each one. All you have to do now is minimize test33 and let it get on with the clicking for you while you do NOTHING!

At this point it is worth going for a cup of coffee. When you return login to the PPC website and click **STATISTICS** and you should see that test33 has already earned you some money !!!

NB – If you do need to turn off your PC or reboot for one reason or another you will need to run the test33 program when you power up.

Double click on the test33 icon and click **NAVIGATION/SIX**.

This should make the browser resume its good work. If not click on **TOOLS/ANALYST/LOOP** again.

Feel free to pass this information on to others to "refer" them. Make sure that you use your unique referral link from the PPC website.

You also get commission when referrals you have introduced use this program, so the more new referrals you get the more extra commision you will earn. I must state at this point that you can still earn a healthy income without signing new referrals.

These are just search engines that get run through this program. There is no spyware or adware contained in these programs.

Please feel free to scan this with McAfee or Nortons virus scan.

What these search engines are doing is paying to try to improve their numbers with Alexa so they have a better

chance of competing with the big boys like Yahoo and Google.

Please note: when you reach the payout amount you can request PPC to send you the money.

At this point you will need to provide details of where you want the money to be sent.

I use my paypal account as it sorts out all the currency changes for you.

Note: If you get a blank page when using the system, don't worry.

If you leave it for about a day you can resume surfing again (its just part of their security)

I have been using this a few weeks now and I have made quite a lot of money!!
